

NORTH EAST LINK CORRIDOR OPTION A

Key

- Potential corridor
- Potential minimum tunnel length
- Potential interchange
- Potential upgrade works and ramps
- Urban Growth Boundary

Extensive tunnelling would be used to protect sensitive environmental and heritage areas.

This route is indicative only. It is subject to further technical, engineering and other studies.

What is the Urban Growth Boundary (UGB)

The UGB helps direct growth to areas with appropriate infrastructure and services while protecting rural and environmental areas from development pressure.
