

NORTH EAST LINK

OBJECTIVES AND PRINCIPLES

As part of our early work, we developed objectives and principles for North East Link.

We used these, together with input from stakeholders and communities, to assess and compare different corridor options.

Objectives

Objectives tell us **what** any option for North East Link must achieve.

The objectives require improvements to existing conditions in Melbourne's north, east and southeast.

Objective 1	Connect more businesses to customers, workers and other businesses
Objective 2	Connect more people to jobs and education
Objective 3	Make freight move more efficiently
Objective 4	Make neighbourhoods in the north-east safer and easier to travel in

Principles

Principles guide **how** we plan and design the new road.

Principle 1	Minimise impacts on communities
Principle 2	Minimise impacts on the environment and places with cultural or heritage value
Principle 3	Minimise impacts during construction
Principle 4	Use resources efficiently
